

Water resistant? Yes. Sidewalk resistant? No.

SquareTrade tested the new water-resistant Samsung Galaxy S7 and S7 edge versus the iPhone[®] 6s and 6s Plus. What did we learn? The new Galaxy phones are the most water-resistant we've ever seen, far outlasting both iPhone models underwater. However, when it comes to glass durability, the ion-strengthened iPhone 6s screen still reigns supreme.

Breakability Factors								Breakability Score
	Gripability	Weight	Water Test	Corner Drop	Face Down Drop	Bendability Test	Tumble Test	
Samsung Galaxy S7	5	6	2	5	10	3	6	5 MEDIUM RISK
Samsung Galaxy S7 edge	5	6	3	9	6	10	6	6 MEDIUM RISK
iPhone 6s	5	5	6	3	7	3	1	4 MEDIUM RISK
iPhone 6s Plus	7	8	10	4	7	2	8	6.5 MEDIUM RISK

HOW WE CALCULATE THE SQUARETRADE BREAKABILITY SCORE™

The SquareTrade Breakability Score compares the breakability of today's top devices. Each device is reviewed and scored based on a number of factors, from physical characteristics to the results of SquareTrade's drop, dunk, bend and tumble tests. The higher a device scores, the higher the risk of it breaking due to an accident.
