

THE GOOD THE BAD & THE CHILLY

SquareTrade tested the new iPhone 6s and 6s Plus, as well as the Samsung Galaxy Note®5. What did we learn? With the release of the new iPhone 6s Plus, Apple has closed the door on the #bendgate scandal. Meanwhile, no amount of ionized glass can save your phone from a face-down drop on the sidewalk. And when it comes to freezing temperatures, our new Thermo Rig proves that iPhone 6s users may be left out in the cold.

iPhone 6s

iPhone 6s Plus

Breakability Factors								Breakability Score
	Gripability	Weight	Water Test	Corner Drop	Face Down Drop	Bendability Test	Thermo Test	
iPhone 6s	5	5	2	3	7	3	8	4.5 MEDIUM RISK
iPhone 6s Plus	7	8	2	4	7	2	5	5 MEDIUM RISK
Samsung Galaxy Note5	7	7	1	3	10	4	3	5 MEDIUM RISK

HOW WE CALCULATE THE SQUARETRADE BREAKABILITY SCORE™

The SquareTrade Breakability Score compares the breakability of today's top devices. Each device is reviewed and scored based on a number of factors, from physical characteristics to the results of SquareTrade's drop, dunk, bend and temperature tests. The higher a device scores, the higher the risk of it breaking due to an accident.
